```

(1) 6 and 9  (2) 9 and 8  (3) 8 and 9  (4) 9 and 6

87. You are having 2 cubes X and Y in front of you that are placed adjacent to each other.

Study the information about these cubes that is given below:

Cube X is on your left side and cube Y is on your right side.

X has one pair of opposite faces painted red. Another pair of opposite faces is painted blue and one of the remaining faces is painted yellow and other one is violate.

Y has only one pair of opposite faces painted blue. Another pair of opposite faces has brown and green colour while remaining opposite pair has black and white colour.

If red face of cube X and blue face of Y are touching table, yellow of X and brown of Y are facing you; then select the colour of face of cube Y that is facing blue side of cube X.

(1) Definitely black  (2) Either black or white
(3) Only white       (4) Cannot be determined

Cube X is on your left side and cube Y is on your right side.

One of the opposite faces pair of cube X is painted red. Another pair of opposite faces is painted blue and one of the remaining faces is painted yellow and other one is violate.

Only one pair of opposite faces of cube Y is painted blue. Another pair of opposite faces has brown and green colour while remaining opposite pair has black and white colour.

If red face of cube X and blue face of Y are touching table, yellow of X and brown of Y are facing you; then select the colour of face of cube Y that is facing blue side of cube X.

(1) Definitely black  (2) Either black or white
(3) Only white       (4) Cannot be determined
Measurements of lizard like animal are as follows. Its head is 7 cm long. Its body length between the head and the tail is equal to the head plus tail. The tail length is equal to the head plus one half of the body length between the head and the tail. Select the option that indicates total length of the lizard.

(1) Information is insufficient  (2) 63
(3) 56  (4) 42

Identify the wrong term, in the given number series:

6, 24, 72, 240, 726

(1) 24  (2) 72  (3) 240  (4) 726

Identify the wrong term, in the given number series:

6, 24, 72, 240, 726

(1) 24  (2) 72  (3) 240  (4) 726
90. Study the following information carefully and answer the question asked:

Seven candidates Hari, Samir, Nilesh, Shailaja, Nikita, Laxman and Sujata are interviewed for selection as teacher by different panels I to VII for different school A, B, C, D, E, F and G not necessarily in the same order of schools and panels. Nilesh is interviewed by panel IV for school A. Samir is interviewed by panel III but not for school C or D. Hari is interviewed for school B, but not by panel I or II. Nikita is interviewed by panel VI for School E. Panel VII conducts the interview for school F. Shailaja is interviewed by panel I but not for school C. Panel II does not interviewed Laxman.

Who was interviewed by Panel V?

(1) Hari (2) Shailaja (3) Laxman (4) Sujata

91. There are six routes for reaching from town A to hill town B. Three of these are indicated by P, Q and R and other three are indicated by 1, 2, and 3. Route Q is closed during stormy weather. Routes P, 1 and 3 are affected by flooding of one river. If route 1 is closed, route R gets closed automatically as both are bifurcations of the single route from A after some distance. Select the route/s which is/are available for transport when weather is stormy and causes flooding of the rivers that affect the routes.

(1) Only Q (2) Only P (3) Only 2 (4) R and 2 both
